ABOUT US

This is an exclusive range of a resplendently beautiful collection of laminate designs that splashes an exemplary touch of articulate renditions for you to cherish for long. Do away with ordinary designs and give way to a touch of panache class that re-invents the forms of laminate sheets to another level altogether. Made with finesse after extensive R&D, this is a collection that revolves around an aura of fabulous touch and emanates an exclusive eminence of distinct class and charismatic style.

All testes may not valid for embossed & metallic laminates.

- Product Size** : High Pressure Decorative Laminated Sheets
: 2440mm x 1220mm (8 x 4 ft.)
- Quality Standard** : Imported Design base paper are used
Use of best quality kraft paper.
Use of 100% melamine resin and 100% phenolic resin.
Use best chemicals and raw material for better flexibility & durability.
- Limited Warranty** : Iconix warrants that its products are reasonably free from manufacturing defects. The products when properly used will comply, with normal deviations, to related manufacturing specification. It excludes damage resulting from accidents, abuse or lack of Care, improper used and / or any alteration. It is recommended that the product must be inspected prior to installation and our liability will be limited to the extent of the cost of the product only. Siesta Laminates are used for various applications, without possibility of control over the manufacturing of the finished product. The company does not assume obligations or liabilities arising from the furnishing, sale, installation or repair, use or subsequent sale of any products, to any person or entity.
- Care & Maintenance** : Cleaning should be carried out with a soft moist cloth and warm solution. Do not use Detergents containing abrasive particles or excess soda.
- Note**
1. Samples presented are indicative of colour, pattern and surface finish but not of actual thickness. High gloss sheets are recommended for vertical application only.
 2. Finishes other than shown here will be available on request
 3. Siesta Laminates provides only replacement of the product if any manufacturing fault occurs. No replacement guarantee will be given if any application or handling mistake is done by the carpenter. Also company is not liable for fevicol and plywood replacement if any problem occurs in pasting laminates.
- Direction To Use**
- Before using the laminate, ensure that the surface of plywood and laminate is clean, dry, leaved and free of oils, excess moisture or other contaminants, such as dust, synthetic particles etc.
 - The adhesive should always be stirred before use. Sufficient adhesive should be applied on either or both of the surfaces to be bonded. Don't add water to the adhesive, it makes the bonding weak.
 - Once the adhesive applied is tacky in nature (usually requires 5-10 minutes, depending on atmospheric conditions), the laminate should be placed on the surface, accurately aligned.
 - Sufficient bonding pressure to ensure intimate contact necessary for an adequate bond should be applied over the entire area using as much pressure as possible without damaging the assembly. Pinch (rotary press) and heavy weighted rollers are ideal. Hand rolling should be done from the center to the edges to ensure the removal of all air bubbles. The edges should be rolled twice.
 - For satisfactory bonding, the area in question should be kept under pressure for a period of 12-18 hours (depending on atmospheric conditions).
 - In rainy season or when humidity is too high, moisture may-condense on the surface during drying (known as "blushing") and will prevent an acceptable bond. Hot spray or forced air drying may be used to help prevent this condition.
 - It is recommended that the maximum sheets size used for vertical field application be limited to 610 x 2440mm (2 x 8 ft) larger panels are required, these should be fabricated in the shop.
 - When laminate is pasted vertically, maintain uniform pressure on all sides till adhesive is dried.
 - To avoid stress cracking, avoid making cut outs having sharp and rough edges.
 - A gap of minimum 2mm should be maintained between two laminates, while pasting side by side.

Zero Reflection | Anti Finger Mark | Anti Scratch | No Repeat Design

NO CLAIM WILL BE ENTERTAINED FOR AIR BUBBLES

NO CLAIM WILL BE ENTERTAINED FOR CRACKING ARISING OUR OF GROOVE CURRYING OR L-SHAPE
